Biggest One-Stop Medical Centre
in Yemmiganuru

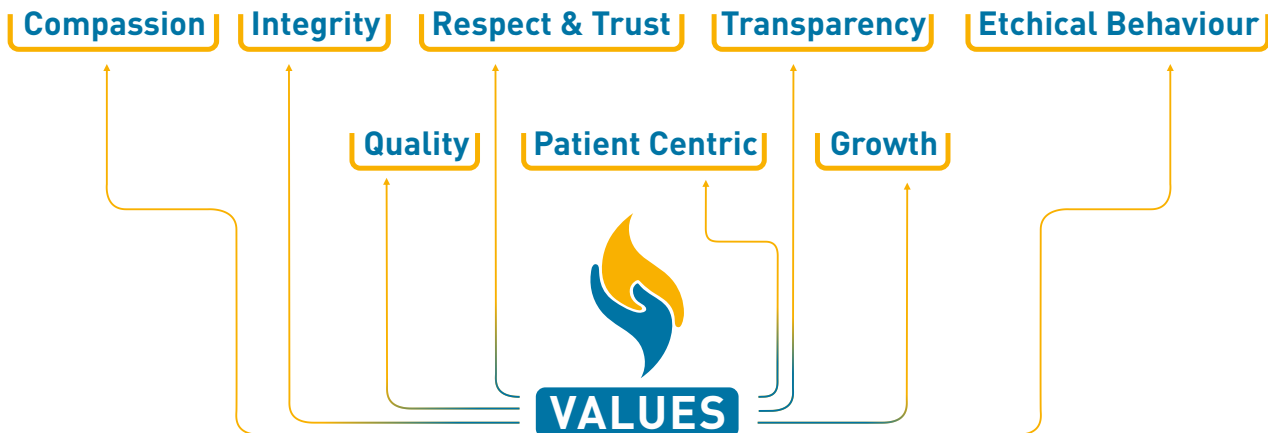

VISION

We want to become a trusted leading brand in Healthcare sector that provides high quality healthcare solution, with a reputation for extensive patient care, distinctive performance and sustained growth.

MISSION

To offer comprehensive state-of-the-art healthcare services in an environment where compassion, quality and safety are integral to care, where we are proud to serve patients and where meeting the challenges of complex medical needs plays an important role in defining competence.

YOUR CARE IS OUR PRIORITY

Sairam Nursing Home is driven by the aim to provide quality treatment at a pocket friendly cost to its patients. Located in the heart of the city of Yemmiganur, Andhra Pradesh, it is a multi-speciality care with comprehensive team of eminent doctors who have excelled in their field of speciality and special patient care programmes. Consisting of 53 beds, this ultra modern facility utilises and showcases the latest technologies used in world-class health care. Some of the technologies include free flow laminar operation theatres, modular operation theatres, centralised air conditioned – ICUs, delivery room, special rooms, array of latest medical equipments like radiant heat warmers, phototherapy units, ventilators, defibrillators, dialysis machines and others. We are committed to offering a never-before medical service to our patients. Hence, we believe in providing an expeditious diagnosis and treating the patients with empathy. Sairam Nursing Home is the first and only advanced and comprehensive hospital established in and around surroundings of Yemmiganur.

SPECIALTIES:

ORTHOPAEDICS

The orthopaedic department at Sairam Nursing Home, managed by Dr. Raghu K. S and his team, has already been popularly known and recognised for many successful treatments done in yemmiganur for past 4 years. With the ever growing latest treatment modalities in orthopaedics, we at Sairam Nursing Home are now centre for excellence at all sub-disciplines of orthopaedics like joint replacement surgeries, spine surgeries, arthroscopy, deformity corrective surgeries. We provide professional expertise and personal care treatment for our patients.

ACUTE TRAUMA CARE

The Acute Trauma Care Unit provides care for patients requiring high-acuity support for trauma injuries. At Sairam Nursing Home, the Trauma care structured around the patient experience encompasses seamless care across the continuum of care, a holistic focus on patients' needs, and proactive consideration of the needs.

PAEDIATRIC WITH PAEDIATRIC AND NEONATOLOGY INTENSIVE CARE

The advanced paediatric intensive care unit at Sairam Nursing Home is designed for specialised care to care to ill children. The Paediatric Intensive Care Unit is a multi disciplinary unit where paediatric intensivists, paediatric subspecialists, therapists and nurses specially trained in paediatric critical care work together to provide the best care possible for their patients.

The hospital is also equipped with a special Neonatology Intensive Care for new born babies who need intensive medical attention. And this unit has been under care of professionals and expert nurses.

OBSTETRICS & GYNAECOLOGY CARE

The Obstetrics and Gynaecology department at Sairam Nursing Home has been established to offer a complete care to woman through all the stages of life, starting from pre-conception planning and pregnancy to menopause and beyond. Our team has certified obstetrician and gynaecologist. We have certified nurses, midwives and family medicine providers with Obstetrics diagnose and treat health issues for women of all ages. Moreover specialized care for high-risk pregnancies with doctors and qualified nurses available round the clock.

INFRASTRUCTURE:

ADVANCED LAMINAR AND MODULAR OPERATION THEATRES

These have more benefits than the conventional Operation theatres such as

- Improved air quality maintained from ventilation systems
- Reduced risk of infections
- Improved operational results leading to reduced hospital stay and quicker discharge

NEXT GENERATION INTENSIVE CARE UNITS

The intensive care units of Medical, Neonatal and Surgical are structured to the next level architecture where the whole unit is Centralised air conditioned which helps in

- (a) Restricting the air movement within and between various departments
- (b) Helps in ventilation and filtration to dilute and remove contaminant in the form of airborne microorganisms, viruses, odour, hazardous chemicals and radioactive substances
- (c) In maintaining different types of temperature and humidity requirements for various areas
- (d) Permitting accurate control of environmental conditions
- (e) Control of air quality and air movement

3]

The whole hospital is designed matching the natural ventilated spacious rooms with optional air conditioning facility.

The premises are covered with glazed tiles for better maintenance & easy cleaning.

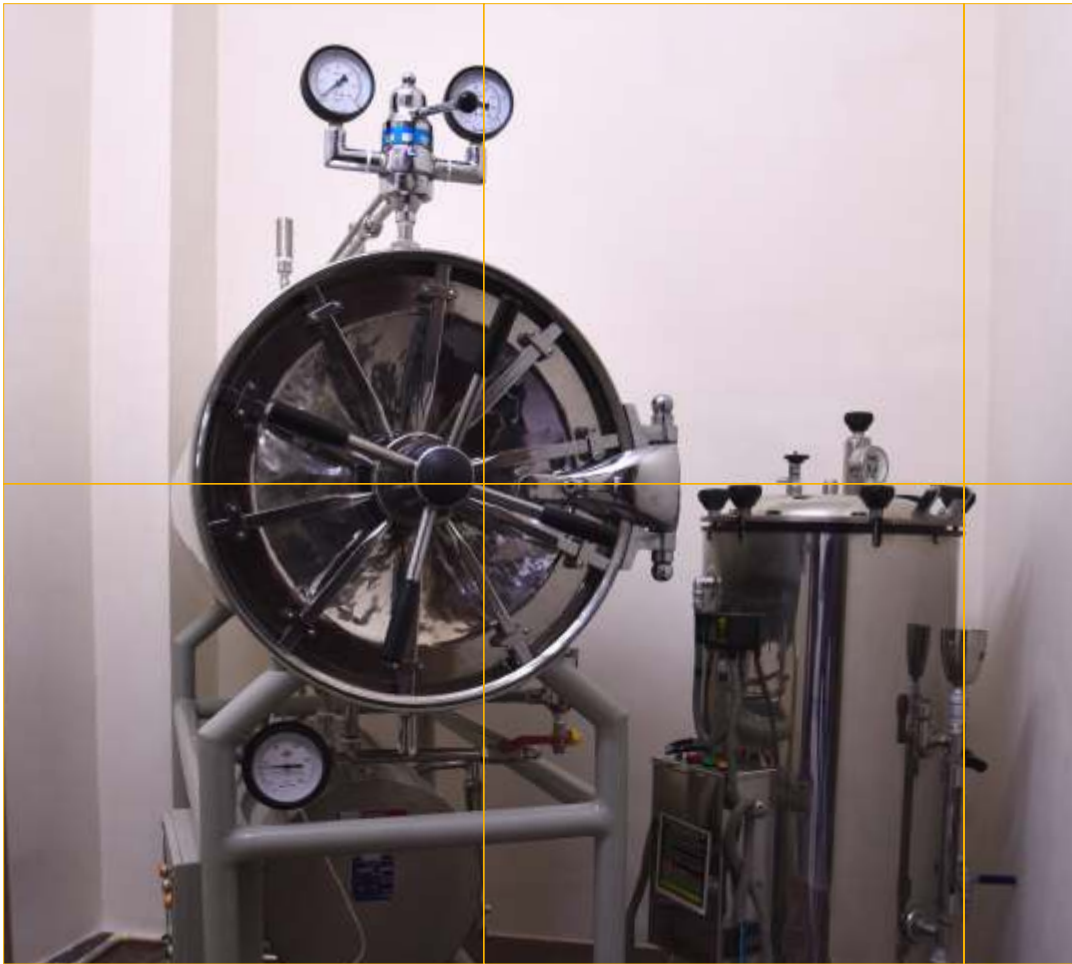

FULLY EQUIPPED NEONATOLOGY INTENSIVE CARE

- The NICU is a 6 bedded facility with a complete centralised air conditioned set up with dedicated Paediatrician and Para- medical staff available round the clock.
- Equipped with latest essential life saving equipments such as Radiant Heater, Incubators, Infusion Pumps, Positive Pressure Ventilators, Photo Therapy Units, Oxygen Hoods, Para-Monitors, Non-Invasive BP Monitors and Blood Gas Analyser
- The infrastructure is supported with feeding room/ formula preparation rooms

ANTIMICROBIAL EPOXY FLOORING

- Epoxy flooring provides an effective and durable floor room solution.
- Epoxy flooring is chemically cross-linked on a molecular level, resulting in a tight, non-porous surface that is unwelcoming to microbial growth.
- And because epoxy floors are installed in their liquid state, when cured they produce a virtually seamless surface without grout lines or other crevices in which debris can collect.

Steam Sterilization Method

The hospital hosts a special room for Steam Sterilization Method which helps in

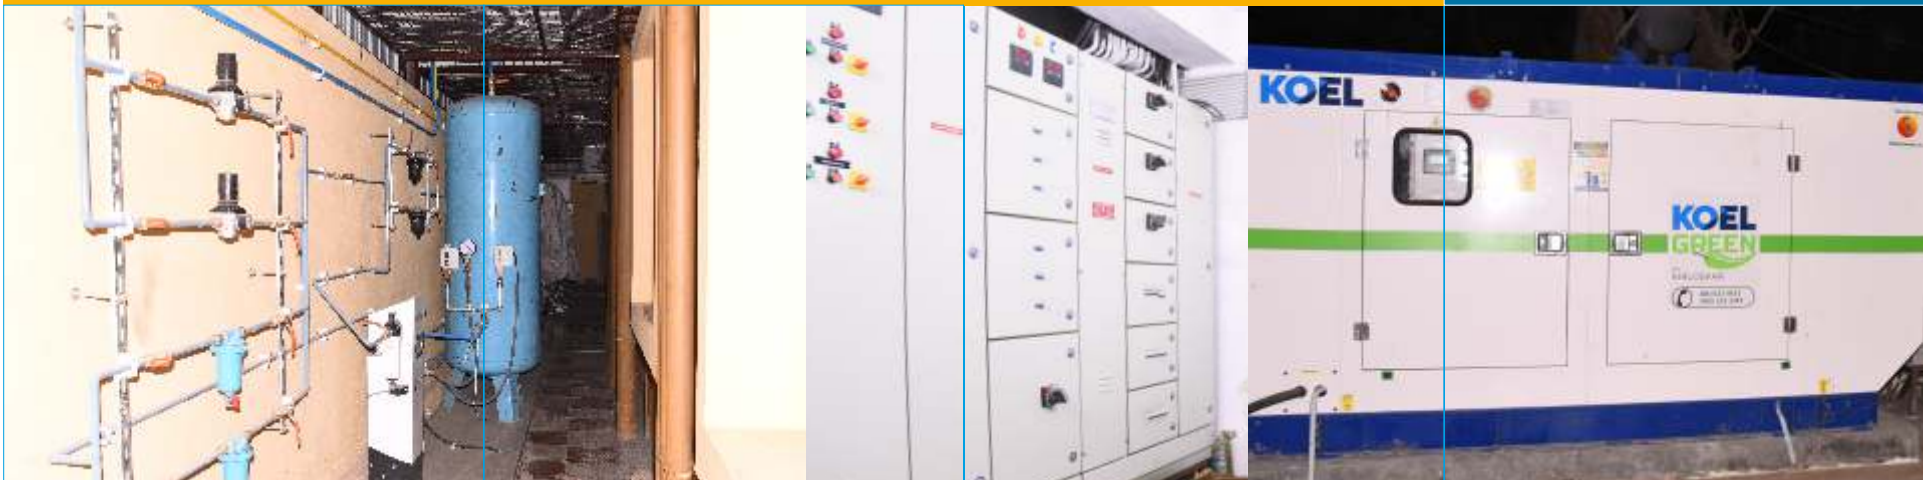

- Non-toxic to patient, staff, environment
- Rapidly microbicidal
- Least affected by organic/ inorganic soils among sterilization processes listed
- Rapid cycle time
- Penetrates medical packing, device lumens

MEDICAL EXCELLENCE:

Power/Electricity:

100% back up with round the clock central UPS/ DG Set back up is available.

Centralised Oxygen and suction line that runs across every bed.

Fire Suppressor System:

Fire and smoke detectors, sprinklers system. Emergency fire exit doors arranged at every floor with dedicated ramp for quick fire escape.
